SWISS KRONO **sensation** STOCK PROGRAM

ALPHA-TAPE® for **sensation** – the perfect finish for an award-winning design

Swiss Krono has developed a sustainable design concept with its **sensation** collection. The Synchro-Wood technology gives surfaces a particularly authentic look and feel by combining visual and haptic qualities and was honored with the German Design Award 2025. To match this, we offer our **ALPHA-TAPE® ABS** edgebanding in same colors and textures, matched to all nine decors and based on oak, alder and elm. Our edges create a harmonious look and their realistic texture emphasizes the natural character of the surfaces. The Soft Matt finish impresses with its matte look, scratch resistance, color fastness, dirt-repellent surface and easy cleaning and care. With **ALPHA-TAPE®** you get the perfect edge for the award-winning **sensation** collection.
